PAYMENT METRICS LLC AND QuERI-INTERNATIONAL TEAM UP

Burke, VA – Payment Metrics LLC and QuERI-International announce an exclusive arrangement to provide international industry forecasting data to targeted markets. QuERI-International will be providing the data and Payment Metrics will be marketing it as part of its corporate consulting services. Initial targeted markets to be served will be the tourism industry and the foreign exchange providers industry. Other industries are expected to be added later this year.

Payment Metrics General Partner Dr. John Min stated, “We are very pleased to be working with QuERI-International. Their data and models are among the most sophisticated in the world and will bring excellent value to our clients. Armed with this information, our clients will be able to fine tune their sales efforts, aligning them with the highest growth geographies and industries they serve.” QuERI-International principal Dr. David Blond commented, “Given the specialized market expertise of Payment Metrics and our advanced forecasting techniques, we expect a very successful collaboration on an international scale.”

About Payment Metrics, LLC

Payment Metrics provides a range of professional services to the financial services industry. The firm offers consulting, M & A, market research, training and executive recruiting services to its clients. Major Banks, Money Service Businesses and Global Financial Services companies are among Payment Metrics international clientele.

About QuERI International

QuERI-International specializes in the development and analysis of large, global data bases covering production, employment, and international trade. QuERI data bases have been used by global companies for forecasting future market demand for their products and in analyzing market potentials. QuERI databases cover 72 countries and 64 industry groups. Forecasts are updated regularly based on the latest developments in the global economy.
